

OptiCA Basic

Optical Internet

Affordable fiber internet for small businesses with everyday connectivity needs

Product Overview

OptiCA Basic is a best-effort internet service designed for small businesses that need reliable, cost-effective connectivity without the expense of enterprise-grade service. This service is available to businesses in select geographic areas where fiber optic facilities have already been installed.

Standard Features

- Fiber-optic internet service
- Budget-friendly pricing
- Dynamic IP address included

Optional Add-Ons

- Static IPv4 addresses
- Retail Public Wi-Fi
- Router management

Service Details & Considerations

All OptiCA services provide high-speed, symmetrical connectivity, meaning upload speeds are equal to download speeds. Discounted pricing is available when bundled with Communications Authority business telephone services.

OptiCA Basic does not include guaranteed bandwidth, uptime guarantees, or guaranteed repair response times.

We solve the telecommunications challenges others overlook
